

# MIDFEST 2022 AUDITION VIDEO SUBMISSION

1.

**Winds decide which two scales you want to submit on video. (Concert Bb, Eb, Ab, or F).  
Percussion prepare snare & timpani etudes.**

2.

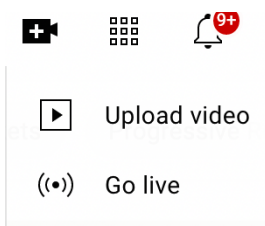

**Create An Unlisted YouTube video.**

Start recording your video. State your name, school, and instrument, then play both scales. Percussionists will upload a separate video for each instrument (snare, timpani, & mallets). All videos must be taken in one sitting – no splicing allowed. We will be listening for tone, intonation, technique, and range.

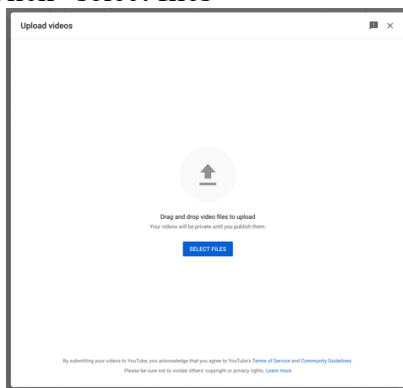

1. Go to youtube.com
2. Login or create a YouTube account
3. In the top right-hand corner of your screen, click on the video camera with the +

4. In the drop-down menu, click on “upload video”

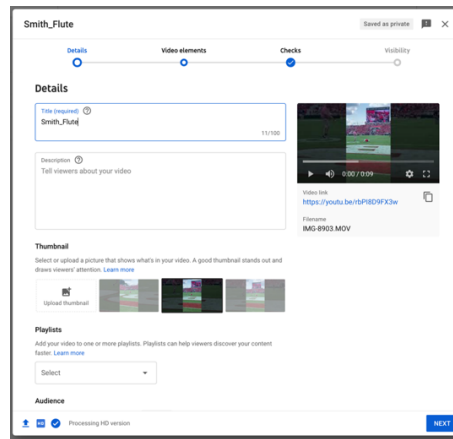

5. A window will pop up. Click “select files”

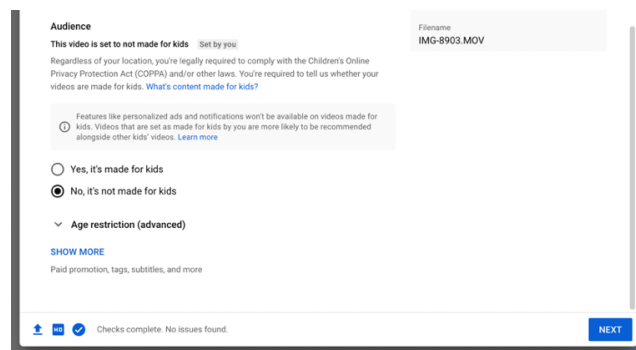

6. Select the file from your computer and click “open”

7. A new box will pop up. Please title your video:  
LastName\_First Name\_Instrument (example: Doe\_John\_Flute)

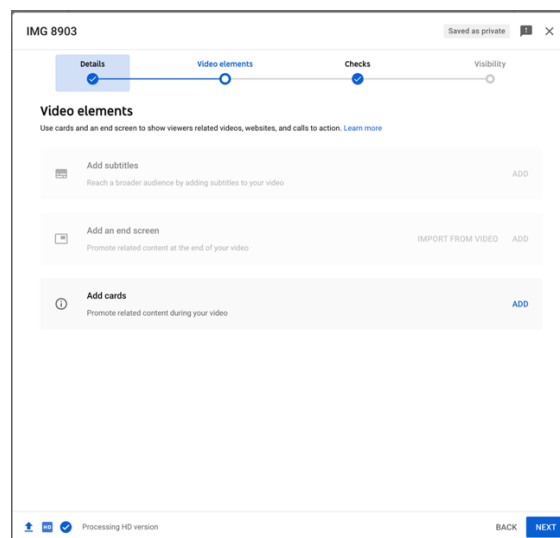

The screenshot shows the YouTube video upload interface for a video titled "Smith\_Flute". The interface has four tabs: "Details", "Video elements", "Checks", and "Visibility". The "Details" tab is active. It contains a "Title" field with the text "Smith\_Flute" and a character count of 11/100. Below the title is a "Description" field with the placeholder text "Tell viewers about your video". To the right of the description is a video player showing a thumbnail of a flute. Below the video player is a "Video URL" field with the text "https://youtu.be/nP8ED9FK3w" and a "Filename" field with the text "IMG-8903.MOV". At the bottom of the "Details" tab is a "Playlists" section with a "Select" dropdown menu. At the very bottom of the interface is a "NEXT" button.

8. Scroll down in the pop-up window and select “no, it’s not made for kids” and then click “next” in the bottom right corner of your pop up window.

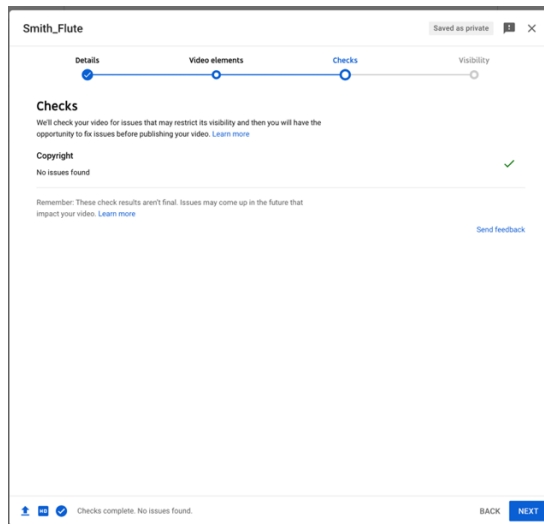

The screenshot shows the YouTube video upload interface for a video titled "IMG-8903.MOV". The interface has four tabs: "Audience", "Video elements", "Checks", and "Visibility". The "Audience" tab is active. It contains a "This video is set to not made for kids" section with a "Set by you" link. Below this is a "Features like personalized ads and notifications won't be available on videos made for kids" section. There are two radio buttons: "Yes, it's made for kids" and "No, it's not made for kids". The "No, it's not made for kids" option is selected. Below the radio buttons is an "Age restriction (advanced)" section with a "SHOW MORE" link. At the bottom of the "Audience" tab is a "NEXT" button.

9. You will now be shown a pop-up that is called “Video Elements” - do not change anything. Click “next” in the bottom right corner of your pop up window.

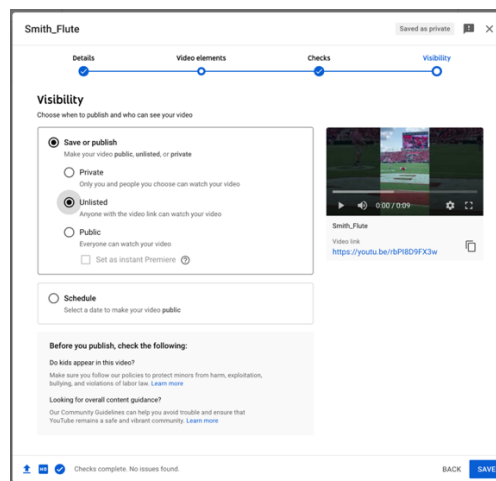

The screenshot shows the YouTube video upload interface for a video titled "IMG 8903". The interface has four tabs: "Details", "Video elements", "Checks", and "Visibility". The "Video elements" tab is active. It contains three sections: "Add subtitles" with a description "Reach a broader audience by adding subtitles to your video" and an "ADD" button; "Add an end screen" with a description "Promote related content at the end of your video" and an "ADD" button; and "Add cards" with a description "Promote related content during your video" and an "ADD" button. At the bottom of the "Video elements" tab is a "NEXT" button.

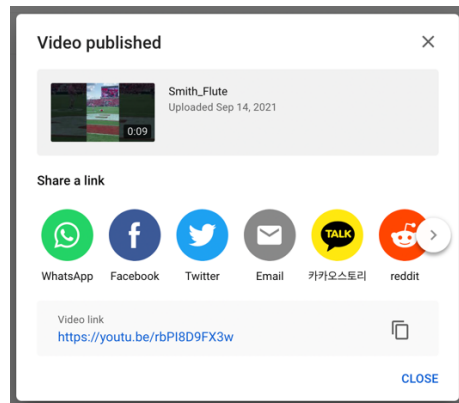

10. You will now be shown a pop-up that is called “Checks” - do not change anything. Click “next” in the bottom right corner of your-pop up window.

11. You will now be shown a pop-up that is called “Visibility”. Click “unlisted” and then click “save” in the bottom right corner of your-pop up window.

12. Copy your video link and click “close”

13. Upload your video link in the following Qualtrics link below in step 3.

3.

Submit your videos to the [Qualtrics link](#).

## Recording Process

- Make sure your instrument is in tune
- Take landscape (horizontal) video
- Exaggerate articulations & dynamics
- BRASS: don't aim bell right at camera!
- Make sure you and your instrument are clearly visible
- If you have recording equipment, definitely use it, but don't add reverb!
